Okayama Air Service Co., Ltd.

Announcement of Launch of Parts Storage Program

Okayama Air Service Co., Ltd. is pleased to announce the launch of its **"Parts Storage Program"** for Textron Aviation parts, effective July 1, 2026.

In recent years, extended lead times and supply shortages for aircraft parts have underscored the importance of securing necessary components in a timely and reliable manner. This program enables customers to purchase parts in advance for future operational needs. The parts will be stored at our facility in Japan and can be dispatched promptly whenever required.
This program is designed to support the advance procurement of long-lead-time parts, reduce AOG-related risks, and facilitate the efficient execution of maintenance planning.
We invite you to consider utilizing this program as part of your maintenance and operational strategy.

【Key Benefits of the Program】

➢ Immediate Access to Parts
By storing parts in domestic storage, customers can avoid overseas procurement lead times and receive shipments precisely when needed.

➢ Optimized Warranty Utilization
The warranty start date may be designed as the shipment date from us to the customer, rather than the shipment date from Textron Aviation. This ensures that the warranty period remains fully intact while parts are stored at our facility.

➢ Reduced Procurement Risk
Securing parts in advance based on anticipated replacement schedules helps mitigate the risk of shortages or extended lead times affecting your operations.

➢ Minimized Downtime in AOG
Pre-purchased spare parts stored at our facility can be dispatched promptly when required, helping reduce aircraft downtime and operational disruption.

➢ Support for Structured Inventory Management

Customers may place consolidated annual orders for anticipated parts usage, with storage available for up to 180 days. This supports more efficient maintenance planning and budget management.

➢ No Storage Fees

No storage fees will be charged during the storage period.
The program is offered at the same pricing as standard parts purchases, providing substantial added value.

【Program Terms and Conditions (Summary)】

- **➢Eligible Parts** : Textron Aviation parts (Cessna and Beechcraft aircraft parts)
  ** Certain parts may be excluded from this program.*
- **➢Storage Period** : Up to 180 days
- **➢After 180 Days** : Parts will, in principle, be shipped to the customer
  ** Additional arrangements may be discussed upon request*
- **➢Order Cancellation** : Not permitted after order placement
